Marine Grade Fiberglass

The marine grade fiberglass in our products is a composite material that provides unrivaled performance and durability in all weather conditions. Premium quality polyester resin is combined with glass fibers to create a material that is as strong and reliable as traditional materials like stone but much lighter in weight. The superior strength-to-weight ratio of fiberglass enables our craftsmen to hand craft innovative designs of all shapes and sizes that can be installed, lifted and carried with ease. Resistant to UV, frost and a range of other weather conditions, marine grade fiberglass is ideal for use outdoors in any climate, from a sunny tower rooftop in Dubai to a New York balcony in winter.

FROST-RESISTANCE

Products made of fiberglass are inherently frost-resistant and can expand and contract during cold winter months due to their general elasticity.

UV-RESISTANCE

Each planter is expertly finished by our post-production team using UV-resistant automotive paint and is protected against extended exposure to harsh sunlight.

LIGHTWEIGHT

Most of our planter designs are light enough to be picked up single handedly and installed with ease anywhere you see fit.

DRAINAGE

With the option of including or drilling your own drainage holes, our pots are suited for indoor as well as outdoor use.

INDOOR-READY

Perfect to define a space in offices and hotel lobbies, our pots are ready for the indoors and will not leak water on floors.

OUTDOOR-READY

Weather resistant finishing with an incredibly strong build allow our products to last outdoors for years on end without losing quality.

durable lightweight hand-made

The flexibility and strength of fiberglass allows for the production of marine, automobile, and complex commercial structures. Each of our unique designs can last for years with proper care and maintenance while preserving the plant life it houses. Our experience in industrial design guarantees that each product is engineered for quality and tough enough to withstand extreme weather conditions without compromising their integrity or beauty.

Tau Classic

Our Classic Range is flawlessly smooth and its coating is hand-finished to the highest quality. Available in a range of colors, the Tau Classic Range adds a touch of contemporary elegance to any space.

Tau Urban

The Tau Urban Range resembles cement with its unevenly textured feel and surface pores giving a uniquely visible appearance. Available in a core of natural color themes, the Urban Range blurs the boundaries between traditional and contemporary: the timeless look of concrete at a fraction of the weight.

TAPERUS

Care & Maintenance

- Strictly use lightweight potting soil when planting to avoid damage such as bowing or cracking.
- To maintain the best look to your planter, wash regularly and lightly wax the surface. Do not use aggressive cleaning agents or high-pressure water.
- Use a wash cloth and warm soapy water as needed. Avoid using materials which may scratch your planters such as steel wool or other abrasive sponges.
- If you desire a glossy or high polish look you may also wax your planters. Ensure that your plant containers are very clean before applying an automotive wax to its surface.

It is very important to only use potting soil formulated for planters and container gardening. This is usually, but not always, a mixture of soil and peat but can vary according to mixture. To ensure you are using the correct type of potting soil for your plant(s), check with a professional to determine the correct regional and plant specific soil to be used.

Additionally, if you are using your planter outdoors it is necessary to drill sufficient drainage to allow excess water to drain from the planter. Drill a hole (minimum 8mm) into the base and elevate the container on small “feet.” Improper installations and other forms of misuse may void the product warranty.

If you are using your planters indoors, drainage holes are not recommended.
